Bogotá, Colombia

I'm a developer with strong expertise in Java, dedicated to designing reliable and scalable applications by applying SOLID and GRASP principles right from the initial planning phase, regardless of project complexity. I have hands-on experience with SQL databases, web API integration, and web development, ensuring efficient solutions. Additionally, I thrive in cross-functional teams and have honed leadership skills by balancing technical tasks with mentoring and team coordination to achieve successful outcomes.

## EDUCATION

*Universidad el Bosque, Bogotá, Colombia*  
**Systems Engineer.**

**Aug 2023 – Dec 2028**

*Generation, Bogotá, Colombia*  
**Junior Java Full Stack Developer.**

**Nov 2024 – Feb 2025**

*SENA, Acacías, Meta*  
**Automation technician.**

**Jan 2012 – Dec 2013**

## PROJECTS

***E-commerce el Zafiro azul***

**Dec 2024 – Feb 2025**

Technologies: Java (Spring Boot), Hibernate JPA, MySQL, JavaScript (vanilla), JWT

- Developed backend using Spring Boot, Hibernate JPA, and MySQL, managing products, users, and orders efficiently.
- Applied SOLID principles, GRASP patterns, and integrated secure JWT authentication for session management.
- Built a responsive frontend with vanilla JavaScript for a smooth cross-device user experience.

## WORK EXPERIENCE

*Teleperformance, Bogotá, Colombia*

**Mar 2023 – Jan 2025**

**Team Leader**

- Consistently recognized as a top performer, leading teams to exceed KPIs.
- Designed a strategy that reduced ticket handling times by 50%, optimizing team efficiency.
- Led a 20% improvement in quality KPIs through personalized coaching and goal setting.

## SKILLS
